Тип работы: Эссе

Предмет: Английский продвинутый

-

since 1994, operations are performed for children of several days of age.

Leo Antonovich is an inventor and innovator, many types of surgical interventions were introduced by him for the first time. Boris Yeltsin and Zurab Sotkilava trusted him with their lives. So that patients rarely get into the operating room, Bokeria actively promotes a healthy lifestyle. The doctor and the academician believes, work should not be for salary or gratitude, the main reward is the recovery of the patient.

Leo Bokeria began his working life in the third year of indstitute, during his student practice at the district hospital. The beginning physician was entrusted with an appendix removal operation. After graduating from the postgraduate studies in 1968, Leo came to work at the Institute of Cardiovascular Surgery, which shortly before that was named after the founder and first director Alexander Bakulev.

The name Leo Bokeria is mentioned in almost 200 patents for inventions. Among them are techniques for using extremely low temperatures, cauterization with plasma and laser, implantation of a full-flow valve and an electric cardiac
